### STATE TOBACCO-PREVENTION SPENDING vs. STATE TOBACCO REVENUES AND ANNUAL SMOKING-CAUSED HEALTH COSTS

[All amounts are in millions of dollars per year, except where otherwise indicated. Full values are listed for amounts below one million.]

Despite receiving massive amounts of annual revenue from tobacco taxes and the state tobacco lawsuit settlements with the cigarette companies, the vast majority of states are still failing to invest the amounts recommended by the U.S. Centers for Disease Control and Prevention (CDC) to prevent and reduce tobacco use and minimize related health harms.

Notes: Annual funding amounts only include state funds.

Annual state health care costs and CDC annual spending targets are from CDC, *Best Practices for Comprehensive Tobacco Control*, January 2014. State annual smoking-caused health cost data adjusted to 2018 dollars.

National health care costs are from Shrestha, SS, et al., "Cost of Cigarette Smoking—Attributable Productivity Losses, U.S., 2018," *AJPM*, July 27, 2022 (based on earlier data from Xu, X, et al., "U.S. healthcare spending attributable to cigarette smoking in 2014," *Preventive Medicine* 150:106529, 2021.)

State settlement revenue estimates reflect base payments made to the states adjusted for inflation and volume as required by the Master Settlement Agreement.

State tobacco tax revenue estimates are based on monthly and annual revenue reports from Orzechowski & Walker's *Tax Burden on Tobacco* (industry-funded reports), and account for ongoing background declines in smoking as well as projected new revenues from recent tobacco tax increases.
